Overview

Quickstart

Copy page

Start searching with Tavily in under 5 minutes.

Get your free Tavily API key

Head to the **Tavily Platform** and sign in (or create an account). Then, copy one of your API keys from your dashboard.

Get your free API key

You get 1,000 free API Credits every month. **No credit card required.**

Install Tavily

Install the Tavily SDK in your language of choice.

Python

JavaScript

Copy

Ask AI

pip install tavily-python

Start searching with Tavily

Run your first Tavily Search in 4 lines of code. Simply replace the API key in this snippet with your own.

Python

JavaScript

cURL

Copy

Ask AI

```python
from tavily import TavilyClient

tavily_client = TavilyClient(api_key="tvly-YOUR_API_KEY")
response = tavily_client.search("Who is Leo Messi?")

print(response)
```

Next steps

That's all it takes to start using Tavily's basic features!If you want to learn how to implement more complex workflows in Python, check out our intermediate-level **Getting Started notebook**.Or, dive deep into our API and read about the different parameters on our **API Reference** page, and learn how to integrate natively with one of our **SDKs**.
